AME 436 – Energy and Propulsion - Spring 2016

Instructor: Paul Ronney
Office: Olin Hall 430J, 740-0490, ronney@usc.edu
Office hours: Thursdays 1:00 to 4:00 pm; other times by appointment

Teaching Assistant:
DJ Lee (dongilee aat usc dot edu)
Office hours: Thursdays 11:00 am – 12:00 pm, Fridays 10:00 am – 12:00 pm, VHE 202

Graders:
Robert Lee (robertjaehoonlee aat gmail dot com); Zengsu Shan (zshan aat usc dot edu)
(For questions about solving homework problems, please contact PDR or DJ, not the graders.)

Lecture: 6:40 – 9:20 PM Wednesdays, OHE 132

Final: Wednesday, May 4, 7:00 - 9:00 pm.

Web page: http://ronney.usc.edu/ame436/

Required texts:
None; course will be taught primarily from lecture notes

Possibly useful supplemental materials:
  (http://catalogs.mhhe.com/mhhe/viewProductDetails.do?isbn=007028637X)
  (https://www.aiaa.org/PubDetail.aspx?id=12218)
  (http://catalogs.mhhe.com/mhhe/viewProductDetails.do?isbn=0073380199)

- Exams will be open book and notes
- Homework problems will be assigned Fridays and due the following Friday at 4:30 P.M.
  Late homework will be marked down 10 points (out of 100 total) per working day late.
  The fact that it was “someone else’s fault” (e.g., your roommate overslept or forgot to turn it in, your computer crashed, the printer ran out of ink, etc.) doesn’t matter. Since everyone has some valid reason for missing or doing poorly on at least one homework assignment, your lowest homework score will be eliminated.
• The deadline for disputing grading of homework or exams is **two weeks from the day the graded material is returned**. So if you pick up your graded material three weeks after it's available, that’s too late to “file a claim.”

• To request reconsideration of a homework grade, send an email to the graders via [ame436usc@gmail.com](mailto:ame436usc@gmail.com). Attach a picture of the disputed part along with an explanation as to why you believe the grade should be changed. Send a separate email for each problem you believe needs reconsideration.

• Electronic versions of homework and exam solutions will not be posted. Hard copies will be available for on-campus students; DEN students will have solutions sent to their individual DEN mailboxes.

• There will be no “extra credit” assignments. If extra credit is offered to one student, I have to offer it to every student, in which case it becomes just another assignment and the number of assignments is already enough for the course.

• **Grading policy**
  - The average course grade will be close to the Viterbi School average of about 3.3/4.0, perhaps a bit higher if I decide in the end that this class is better than average, or a bit lower if... well you get the idea. But it’s very unlikely that the average grade will be above 3.4 or below 3.2.
  - I’ll adjust the weighting of the two midterms separately so that getting an average grade on either will give you the same number of points toward your total course points. The same consideration applies to the final exam, though the final is weighted 1.5 times higher than each midterm.
  - I try hard not to give any grade below C, since you need to maintain a C average to stay here, so if I give you a grade below C that implicitly means I believe you effectively failed the course. Rarely do I have to give below a C to someone who did all the work. The major source of low grades is students not doing the homework and thus losing 30% of their grade. Viterbi students as a group are extremely competitive in the sense that the standard deviation of scores is small, so losing 30% of your total score would typically move one from the A range to the C range.

**Collaboration policy:**

• You may
  - Work with others to find solutions to lecture and lab homework assignments
  - Study with others for exams

• You may **NOT**
  - Copy homework assignments from others – even if you work together, you must prepare and turn in assignments that were created by you only
  - Work together during exams

• **Violators will be reported to the Office of Committee for Student Judicial Affairs and Community Standards** ([http://www.usc.edu/student-affairs/SJACS/](http://www.usc.edu/student-affairs/SJACS/))
Academic integrity

Viterbi Honor Code (developed by Viterbi students):

- Engineering enables and empowers our ambitions and is integral to our identities. In the Viterbi community, accountability is reflected in all our endeavors.
- These are the pillars we stand upon as we address the challenges of society and enrich lives.

*SCampus*, the Student Guidebook, ([http://scampus.usc.edu](http://scampus.usc.edu)) contains the University Student Conduct Code (see University Governance, Section 11.00).

Academic Conduct

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in *SCampus* in Section 11, Behavior Violating University Standards [https://scampus.usc.edu/1100-behavior-violating-university-standards-and-appropriate-sanctions/]. Other forms of academic dishonesty are equally unacceptable. See additional information in *SCampus* and university policies on scientific misconduct, [http://policy.usc.edu/scientific-misconduct/](http://policy.usc.edu/scientific-misconduct/).

Discrimination, sexual assault, and harassment are not tolerated by the university. You are encouraged to report any incidents to the Office of Equity and Diversity [http://equity.usc.edu/](http://equity.usc.edu/) or to the Department of Public Safety [http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us](http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us). This is important for the safety whole USC community. Another member of the university community – such as a friend, classmate, advisor, or faculty member – can help initiate the report, or can initiate the report on behalf of another person. The Center for Women and Men [http://www.usc.edu/student-affairs/cwm/](http://www.usc.edu/student-affairs/cwm/) provides 24/7 confidential support, and the sexual assault resource center webpage sarc@usc.edu describes reporting options and other resources.

Support Systems

A number of USC’s schools provide support for students who need help with scholarly writing. Check with your advisor or program staff to find out more. Students whose primary language is not English should check with the American Language Institute [http://dornsife.usc.edu/ali](http://dornsife.usc.edu/ali), which sponsors courses and workshops specifically for international graduate students. The Office of Disability Services and Programs [http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html](http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html) provides certification for students with disabilities and helps arrange the relevant accommodations. If an officially declared emergency makes travel to campus infeasible, USC Emergency Information [http://emergency.usc.edu/](http://emergency.usc.edu/) will provide safety and other updates, including ways in which instruction will be continued by means of blackboard, teleconferencing, and other technology.
Accreditation Board for Engineering and Technology (ABET) course objectives:

To introduce the student to the design and performance of automotive and aircraft engines including power output, efficiency and emissions.

ABET Course Outcomes: The student will be able to

1. Understand the differences between the basic types of internal combustion engines (premixed-charge reciprocating, non-premixed charge reciprocating, turbojet, turbofan, etc.)
2. Understand the advantages and disadvantages of internal combustion engines compared to alternatives such as steam, electric and solar power
3. Calculate flame temperature for an idealized fuel-air mixture (constant specific heats, no dissociation, etc.)
4. Understand qualitatively how ideal flame temperatures are affected by non-ideal factors such as variable specific heats, dissociation, heat losses, etc.
5. Understand the difference between the following four types of combustion processes: laminar premixed flames, turbulent premixed flames, homogeneous reaction (knock) and non-premixed spray or droplet flames
6. Understand the basics of how NO, CO, unburned hydrocarbons and soot emissions are formed in engines and how they are minimized.
7. Analyze an ideal engine cycle (for either reciprocating or steady-flow engines) using P-v and T-s diagrams
8. Analyze the performance (indicated mean effective pressure, thrust specific fuel consumption, thermal efficiency, etc.) of an ideal Otto, Diesel, Brayton, etc. thermodynamic cycle.
9. Estimate the performance (indicated mean effective pressure, thrust specific fuel consumption, thermal efficiency, etc.) of a Otto, Diesel, Brayton, etc. thermodynamic cycle using a chemical thermodynamics computer program such as GASEQ.
10. Estimate the effect of non-ideal processes (throttling, slow burn, heat losses, knock, compressor/turbine losses, etc.) on an engine cycle using P-v and T-s diagrams
11. Estimate how these non-ideal processes affect engine design and performance.
12. Understand the basic performance and design considerations of hypersonic propulsion systems and how they are analyzed.

The readings are optional, not required. You will not be responsible for material in these readings that is not covered in lectures or the lecture notes.
Legend:
PDR  PDR lectures
PT   Pre-taped lecture (PDR out of town) (Pre-taping times to be announced).
MTn  Midterm exam #n
XXX  Break/end of semester
nA   Homework n assigned
nD   Homework n due

Homework topics:
1. Chemical thermodynamics
2. Combustion and emissions
3. Ideal cycle analysis
4. Unsteady flow engines
5. Thrust and compressible flow
6. Steady flow (propulsion) engines
7. Hypersonic propulsion; practice problems for final exam
